

TRP SHOCK ABSORBER - TRAILER

TRP shock absorbers have been developed and engineered to perform in the harsh Australian environment. With large bore sizes and increased oil capacity, TRP Shock Absorbers can operate cooler over long distances and at constant high speeds. High temperature oil and Viton & HNBR seals also help to ensure that TRP shock Absorbers can run at higher operating temperature's, outlasting standard oils and rubber seals.

FEATURES AND BENEFITS

- Increased oil capacity vastly improves the shock absorbers ability to dissipate heat and operate cooler over long distances and at constant high speeds
- Large bore sizes and upgraded dampening forces ensure the shocks suit higher loads to perform in Australian conditions
- Viton & HNBR seals along with high temperature oil is utilized which helps withstand higher operating temperatures for longer.
